Professional Summary

Software Engineer with hands-on experience building full-stack applications and AI-powered systems using **React**, **Node.js**, **FastAPI**, and **LangGraph**. Skilled in designing multi-agent AI pipelines, RAG-based retrieval systems, and scalable backend architectures. Passionate about combining modern AI tooling with clean full-stack engineering to build real, usable products.

Experience

Software Engineer — Hoicko Technologies, Udaipur, Rajasthan

Sep 2025 – Present

- Working on **Kubernetes**-based deployments and container orchestration for scalable applications.
- Configuring **CI/CD pipelines** using **Azure DevOps** to automate build, test, and deployment processes.
- Managing **DigitalOcean** resources and **Grafana** dashboards for secure data storage and system monitoring.

Projects

Srevox — Self-Hosted Kubernetes Observability & AI Root-Cause Analysis

🔗 [GitHub](#)

- Built a real-time K8s crash detection platform using Go's Kubernetes Watch API feeding a Redis pub/sub pipeline, achieving sub-5s detection latency without polling.
- Designed a full microservices stack (Go agent, Fastify API, Next.js dashboard, AI service) deployable via a single docker-compose, with agentless and in-cluster watcher modes for air-gapped support.
- Integrated AI root cause analysis (OpenAI, Anthropic, Groq, Ollama) with RBAC, multi-cluster support, and multi-channel alerting (Teams, Email, WhatsApp, Webhooks).

AI-Powered Expense & Receipt Analyzer (in progress)

- Building a LangGraph multi-agent pipeline to process uploaded receipts (image/PDF), with an OCR extraction agent and an embedding-based categorization agent for unseen vendors.
- Implementing a RAG pipeline so users can query their spending history in natural language, retrieving relevant expenses from a vector store.
- Exposing agent tools via an MCP server for reuse by other AI clients, backed by a FastAPI + Pydantic backend and a React dashboard for spend visualization.

Skills

Languages: JavaScript, TypeScript, Python, C/C++

Frontend & Backend: React.js, Node.js, Express.js, FastAPI, REST APIs, Tailwind CSS, HTML, CSS

AI & Agents: LangGraph, RAG, Embeddings, MCP (Model Context Protocol)

Databases: MongoDB, PostgreSQL, MySQL

DevOps & Cloud: Docker, Kubernetes, Azure DevOps, AWS, CI/CD

Tools: Git, GitHub, Postman, VS Code

Education

Techno NJR Institute of Technology – Udaipur, Rajasthan

Bachelor of Technology in Computer Science Engineering

(09/2022 – 06/2026) | **Current CGPA:** 8.45/10

Certifications

- Red Hat Certified System Administrator (RHCSA)** – 2025 (ID: 250-121-621)
- Full Stack Web Development Using MERN** – (Grass Solutions)
