Professional Summary

Red Hat Certified System Administrator (RHCSA) with strong expertise in Linux, Docker, Kubernetes, Azure DevOps, and Grafana. Passionate about **DevOps and Full Stack Development, with hands-on experience in building CI/CD pipelines, developing scalable web applications using React and Node.js, and working with databases.** Passionate about learning, growing, and building better solutions with modern technologies.

Experience

DevOps Intern — Hoicko Technologies, Udaipur, Rajasthan

Sep 2025 – Present

- Working on **Kubernetes**-based deployments and container orchestration for scalable applications.
- Configuring **CI/CD pipelines** using **Azure DevOps** to automate build, test, and deployment processes.
- Managing **DigitalOcean** resources for secure data storage and retrieval.
- Setting up **Grafana** dashboards for system monitoring and performance visualization.

Projects

PrepVision AI — Interview Preparation Platform

- Built an **AI interview platform** for written and live interviews with company-specific questions and AI feedback.
- Used **resume data and Hugging Face models** for personalized question generation and evaluation.
- Developed using **React, Node.js, and MongoDB** for interactive interview practice
- Implemented **role-based interview flows and performance tracking** to improve user preparation and insights

🔗 [Live Demo](#)

Fixora — Project Management System (Full Stack)

- Built a role-based ticketing system to manage projects, users, issue workflows, and team collaboration efficiently.
- Implemented **JWT-based authentication, protected routes, role-based access control**, and priority/status-driven ticket tracking.
- Developed a responsive **React.js dashboard with a scalable Node.js, Express.js, MongoDB REST API** backend.
- Designed a scalable system architecture for efficient **project management and multi-user** collaboration
